

"THE NATURAL GAS EXPERTS"

Case Study: School District of Elmbrook

Two years ago, the School District of Elmbrook began examining ways to save money on their natural gas program. At the time, they were sourcing their natural gas with a single supplier and were not familiar with other options. MEP helped analyze their current program and began working collaboratively

“ *The team at MEP helped us navigate from a single sourced supplier to the competitive market which resulted in substantial savings. I appreciate their personalized service and reports and would recommend them to others.*

”
-Mark Monfre

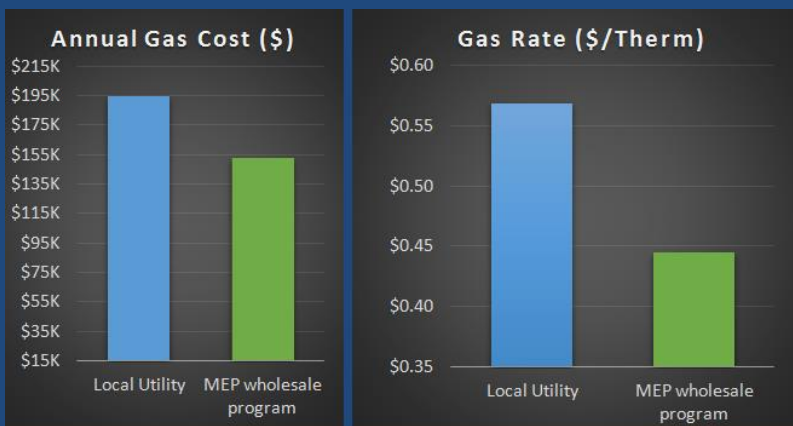

with the District to introduce competition from the market place, a proper contract, and ongoing management to their many accounts. Once the program was initiated, the District began realizing significant savings even despite the low cost gas environment and the warmer than normal winter that Wisconsin experienced. Professional help mixed with sound competition creates costs savings!

Key Details

(recent 12 month analysis)

Net Savings (%)	22%
Net Savings (\$)	\$42,350
Return on Investment	541%
Annual Therm Usage	342,695
Local Gas Utility	WI Gas

In the last year alone Elmbrook Schools saved \$42,350 (22% savings) on their annual natural gas cost versus the local gas utility. This results in a return on investment (ROI) of 541%, which means they saved almost \$5.50 for every \$1 input to set up and run the program.
